STAFFORD:

PRINTED BY DREWRY & WHITAKER, 16 & 17, EASTGATE STREET.

*Stafford,*

*9th April, 1895.*

*TO THE CHAIRMAN AND MEMBERS OF THE  
PUBLIC HEALTH COMMITTEE.*

GENTLEMEN,

I have the honour to submit herewith my report on the health of Stafford for the year 1894.

The death-rate of 12·48 is remarkable. It is the lowest of any year on record, and is 3·68 per 1000 below the average of previous years. The Zymotic, Phthisis, and Infantile rates are all considerably below the average; while at the same time it is gratifying to note that the hitherto steady decline in the Birth Returns has at last been arrested and converted into an increase. The amount of infectious disease present during the year has also been very small. You will notice that the figures generally are the lowest of any that have yet been presented to you.

I am, Gentlemen,

Your obedient servant,

F. MILNES BLUMER.

# REPORT.

## SECTION I.

## SECTION I.

*Vital Statistics, together with Remarks on the Mortality  
during the year.*

**Area.**—The Borough of Stafford contains an area of Area  
1,084 acres.

**Population.**—Estimated to the middle of the year, the Population  
population, including the Public Institutions, is 20,389,  
and is distributed as follows :—

|                           |    |         |        |
|---------------------------|----|---------|--------|
| Stafford Borough..        | .. | ..      | 18,700 |
| County Asylum ..          | .. | 978     |        |
| Workhouse ..              | .. | 261     |        |
| H.M. Prison ..            | .. | 450     |        |
| Total in the Institutions | .. | 1,689   |        |
| Total ..                  | .. | 20,389* |        |

The population gives an average density of 18·8  
persons per acre.

\* The **Corrected Rates** are reckoned upon a population of 19,056, obtained  
by deducting 1,333 from the total; that being the proportion of those in the  
Institutions who do not belong to the Borough.

## Births

**Births.**—The number of Births registered during the year was 643, of which 314 were males and 329 females. This is equal to an annual rate of 33·74 per 1000. It is gratifying to note that the steady decline in the returns, which set in ten years ago, has been arrested, at any rate for this year, and from the table it will be seen that the numbers are higher than those of any year since 1887, and also than the average for the previous ten years.

TABLE SHEWING NUMBER OF BIRTHS FROM 1884 TO 1894.

| Year.                         | Males. | Females | Total. |
|-------------------------------|--------|---------|--------|
| 1884                          | 364    | 328     | 692    |
| 1885                          | 343    | 309     | 652    |
| 1886                          | 349    | 322     | 671    |
| 1887                          | 330    | 338     | 668    |
| 1888                          | 299    | 291     | 590    |
| 1889                          | 311    | 281     | 592    |
| 1890                          | 286    | 282     | 568    |
| 1891                          | 334    | 264     | 598    |
| 1892                          | 281    | 314     | 595    |
| 1893                          | 290    | 286     | 576    |
| <i>Yearly Average 1884-93</i> | 318·7  | 301·5   | 620·2  |
| 1894                          | 314    | 329     | 643    |

## Deaths

**Deaths.**—The total number of Deaths registered during the year was 401. This includes 225 males and 176 females, and gives a death rate of 19·66 per 1000. Of this number of deaths, however, 163 were those of persons who did not belong to the Borough previous to their admission into one or other of the Public Institutions. This reduces the number of Deaths for the Borough to 238, and gives a **Corrected death rate** of 12·48 per 1000.

## Death-rate

These returns are remarkable; the “corrected” ones being lower than those of any previously recorded year, and the death rate 3·69 below the average of the eight preceding years. The death rate for England and Wales for the year was 16·6.

TABLE SHEWING THE NUMBER OF DEATHS FROM  
1884 TO 1894.

| Year.                         | Males. | Females | Total. | Non-Residents. | Residents. | Corrected Rate per 1000          |
|-------------------------------|--------|---------|--------|----------------|------------|----------------------------------|
| 1884                          | 285    | 245     | 530    | 144            | 386        |                                  |
| 1885                          | 274    | 213     | 487    | 130            | 357        |                                  |
| 1886                          | 258    | 208     | 466    | 131            | 335        | 17·71                            |
| 1887                          | 224    | 167     | 391    | 121            | 270        | 13·68                            |
| 1888                          | 252    | 182     | 434    | 110            | 324        | 16·97                            |
| 1889                          | 227    | 246     | 473    | 138            | 335        | 17·04                            |
| 1890                          | 223    | 174     | 397    | 124            | 273        | 14·13                            |
| 1891                          | 245    | 184     | 429    | 139            | 290        | 15·48                            |
| 1892                          | 252    | 199     | 451    | 131            | 320        | 16·84                            |
| 1893                          | 261    | 222     | 483    | 151            | 332        | 17·54                            |
| <i>Yearly Average 1884-93</i> | 250·1  | 203·2   | 453·2  | 131·8          | 321·4      | <i>Average for 8 years 16·17</i> |
| 1894                          | 225    | 176     | 401    | 163            | 238        | 12·48                            |

The 238 deaths were returned in Quarters, thus :—

Quarterly Returns

|              |      |             |       |
|--------------|------|-------------|-------|
| 1st Quarter, | 75   | Death rate, | 15·74 |
| 2nd „        | 60   | „           | 12·59 |
| 3rd „        | 46   | „           | 9·65  |
| 4th „        | 57   | „           | 11·96 |
| Average      | 59·5 | Average     | 12·48 |

**Infantile Mortality.**—There were 74 deaths of infants under a year old, which is equal to a rate of 115 per 1000 registered births. In the previous year the rate was 168, and the average for the ten years 1884-93 was 133. For the whole of England and Wales it was 137.

TABLE SHEWING THE CLASSIFIED CAUSES OF DEATHS IN  
EACH OF THE FOUR QUARTERS.

|                                         | QUARTERS. |     |    |    | TOTALS |

Zymotic Death-rate (including Diarrhœa) in 1894= $\cdot$ 31 per thousand of the population.

Zymotic  
Diseases

I.—Zymotic Diseases.

**Miasmatic Diseases.**—Only 3 deaths (corrected) from the Common Infectious Diseases have been recorded, compared with 13 in the previous year, and 18·3, the yearly average, during the preceding decennium. Measles caused 2 of them, and Typhoid Fever 1. There were no deaths from Scarlet Fever or Diphtheria.

**Diarrhœa** caused only 3 deaths, compared with 14 in the previous year; and they were all of infants under a year old.

III.—Constitutional Diseases.

Phthisis

**Phthisis.**—Last year I reported a mortality from Phthisis of 26, which was lower than had been recorded for many years. This year it is still lower, 24 deaths (corrected) having occurred, which is equal to a rate of 1·25 per 1000.

| Year. | No. of Deaths. | Rate per 1000 |
|-------|----------------|---------------|
| 1886  | 46             | 2·43          |

Developmental  
Class

IV.—Developmental Class.

There have been 58 deaths in this class, as against 66 in the previous year, 14 being ascribed to Premature Birth, 42 to Old Age, and 2 to Congenital Malformation.

V.—Local Diseases.

Local  
Diseases

This class of disease has caused 222 deaths, compared with 263 in the previous year. Diseases of the Nervous System caused 107; Diseases of the Circulatory System

35 ; Diseases of the Respiratory System, 48 ; Diseases of the Digestive System, 15 ; Diseases of the Urinary System, 10 ; and other diseases, 7.

SECTION II.

SECTION II.

**Notification of Infectious Diseases.**— Compared with previous years, there has been a marked decrease in the number of cases of Infectious Diseases. There have been only 47 notified, as against 236 in the preceding year, and 114 and 146 in the years 1892 and 1891. If we deduct the 23 Erysipelas cases, we have the remarkably low number of 24 for the Infectious Fevers. Diphtheria has been entirely absent. and it is worthy of note that there has been only one case of Diphtheria during the past three years.

|                  | Notified | Isolated.  | Percentage Isolated |
|------------------|----------|------------|---------------------|
| Smallpox.....    | 1        | 1          | 100                 |
| Scarlet Fever .. | 13       | 13         | 100                 |
| Typhoid Fever    | 9        | 4 (in      |                     |
| Puerperal Fever  | 1        | Infirmary) |                     |
| Erysipelas ....  | 23       |            |                     |

**Smallpox.**—The single case of Smallpox occurred in the Prison, and was that of a man who had been transferred from Birmingham during the incubation period of the disease. He was admitted into the Smallpox Hospital, and no fresh case occurred.

**Scarlet Fever.**—There were only 13 notifications of this fever, compared with 170 in the previous year. This low figure is accounted for partly by the fact that, through the epidemic of the preceding two years, a large number of children had become protected, but chiefly because prompt isolation was adopted in every case, with disinfection of premises and clothing. As evidence of the advantage of early isolation, I would mention that the removal of the patient in all instances saved the other members of the family from contracting the disease. There

was not a single instance during the year of a second member of a household having Scarlet Fever; and such a result could not, I feel sure, be brought about by any other line of treatment.

**Typhoid Fever**

**Typhoid Fever.**—There were 9 cases of Typhoid Fever, compared with 39 in the previous year, and 51 in 1892. One of the cases was admitted into the Infirmary from the County. The remaining eight were isolated cases, and in none of them could I satisfy myself that the disease was the outcome of any local sanitary defect.

**Puerperal Fever**

**Puerperal Fever.**—One case occurred which proved fatal. The woman in attendance was suspended from work for a month, and her clothing was disinfected.

**Measles**

**Measles.**—This disease appeared in an epidemic form at the beginning of the last quarter, and necessitated the closing of St. Thomas's Schools, and the Infants' Department of St. Paul's and Rowley Street. The type of disease was not so severe as in the year 1889, as evidenced by the fact that only two deaths occurred from Measles, compared with 20 in the year 1889.

**Uninhabitable Houses**

**Uninhabitable Houses.**—Seven houses were reported as being in such a condition as to render them unfit for human habitation. Four of these were closed, and the remaining ones had the necessary alterations carried out so as to render them habitable.

**Lodging Houses**

**Lodging Houses.**—In the early part of the year I made an inspection of all the Common Lodging Houses, and presented an exhaustive report on the subject. The various defects and irregularities were detailed, and my recommendations for the better management of these houses were fully set forth in it. I need not therefore refer to the subject here.

**Vaccination Statistics**

**Vaccination Statistics.**—The subjoined figures apply to the whole of the Stafford Union, but they serve as an index of how the provisions of the Vaccination Act are being carried out.

---

|                                    |     |
|------------------------------------|-----|
| Number of Births in 1893 was.....  | 859 |
| Successfully Vaccinated .....      | 703 |
| Dead Unvaccinated .....            | 82  |
| Insusceptible .....                | 9   |
| Postponed .....                    | 21  |
| Removed to districts unknown ..... | 39  |
| Not Vaccinated .....               | 5   |

**Disinfection** of premises and clothing has been Disinfection efficiently carried out during the year, as evidenced by the fact—to which I have already drawn attention—that there has been no recurrence of infectious disease in a household after the patient had been removed. The new Washington Lyon apparatus works most satisfactorily.

**Sanitary Inspection.**—Appended hereto is a table Sanitary giving a summary of the work done during the year in the Inspection Sanitary Inspector's Department. The notices which were issued to abate the various nuisances are set forth in it, as well as the number of inspections made. The Slaughter-houses, Bake-houses, Cow-sheds, Dairies, and Milk-shops, have been visited regularly.

The Statistical Tables required by the Local Government Board are appended.

F. MILNES BLUMER.

SUMMARY OF SANITARY WORK DONE IN THE INSPECTOR OF  
NUISANCES' DEPARTMENT DURING THE YEAR 1894, IN THE  
URBAN SANITARY DISTRICT OF STAFFORD.
